FOR IMMEDIATE RELEASE

Wizzride Launches Shared Sightseeing Tours to Tsomgo Lake, Baba Mandir and Nathula Pass from Gangtok

Northeast India's trusted shared mobility platform introduces an affordable per-person sightseeing service for one of Sikkim's most iconic high-altitude circuits, starting November 2026

Gangtok, Sikkim — October 2026

Wizzride Technologies, Northeast India's leading shared mobility and travel platform, has launched a new shared sightseeing service covering Tsomgo Lake, Baba Mandir and Nathula Pass from Gangtok. The service is now live and available for booking at wizzride.com/sightseeing.

The Tsomgo Lake, Baba Mandir and Nathula Pass circuit is one of the most sought-after day excursions in Sikkim, combining a high-altitude glacial lake, a revered military shrine and a historic mountain pass on the India-China border — all within a single 9-hour itinerary. Until now, travellers to Gangtok have largely depended on private cab arrangements to access this route. Wizzride's new shared sightseeing service makes the experience available at **Rs. 1,713 per person**, significantly reducing the cost for solo travellers, couples and small groups.

One Experience. Two Ways to Travel.

Wizzride's sightseeing service offers two booking options for the Tsomgo-Baba Mandir-Nathula circuit. The Shared Tour at Rs. 1,713 per person allows travellers to share a vehicle with other passengers from a fixed boarding point in Gangtok. A Private Tour option is also available for those who prefer exclusive use of a vehicle, with pricing that varies depending on the vehicle type chosen. Both options include the vehicle, driver, fuel, road tolls, parking and the required sightseeing permits — with Wizzride handling the entire permit process on behalf of the traveller.

The service departs at 8:00 AM from a fixed boarding point in Gangtok and returns by approximately 5:00 PM. It operates Tuesday to Sunday and covers approximately 110-120 km across the three destinations.

Permits Arranged and Included

Access to Nathula Pass requires a special sightseeing permit issued by the Government of Sikkim, separate from the standard Inner Line Permit. Wizzride manages the complete permit process as part of the booking — travellers are contacted after booking to submit their documents through a secure process. The permit cost is included in the tour price.

> *"We have always believed that great travel experiences should be accessible and not just reserved for those who can afford a full private cab. The Nathula Pass circuit is genuinely one of the most remarkable day journeys in Northeast India — you go from Gangtok at 1,650 metres to the India-China border at over 14,000 feet in a single morning. Making that accessible to a solo traveller or a couple at an affordable per-person rate is exactly the kind of experience we set out to create when we built Wizzride."*

A Natural Extension of Wizzride's Northeast Footprint

Wizzride has operated shared cab services across Northeast India since 2016, connecting travellers between Bagdogra Airport, Gangtok, Darjeeling, Kalimpong, Guwahati, Shillong and other major destinations in the region. The launch of sightseeing services represents a natural expansion of that model — applying the shared mobility approach to in-destination experiences rather than only intercity transfers.

About the Destinations

Tsomgo Lake, also known as Changu Lake, is a glacial lake at approximately 3,753 metres above sea level located around 35 km from Gangtok. Baba Mandir, located at around 4,023 metres, is a military shrine dedicated to Harbhajan Singh of the Indian Army. Nathula Pass, at 4,310 metres on the India-China border, is part of the historic Silk Route and is one of the few points on the border open to Indian tourists.

Booking and Availability

The shared sightseeing tour is available for booking at wizzride.com/sightseeing and through the Wizzride app. The service operates Tuesday to Sunday. Travellers are advised to book in advance as shared seats are limited per departure.
